

LETTER OF RECOMMENDATION

Dear Admission Committee Members, I am immensely pleased to write a letter of recommendation for Ms. M G Preethi for admission to the master's program at your esteemed university. I work as Software Development Lead in Brillio Technologies and have known Ms. M G Preethi for more than 1.5 years duration as her team lead.

M G Preethi was recruited as Software Development Engineer to work for Verizon client. She has worked on automating the deployment of VNF's using Java, SQL, and Spring boot. M G Preethi was given complex tasks to test her ability, how she responds, to my surprise, she not only accomplished them on time but also documented and tested it very well and written code with the highest business standards. Throughout her time here being a developer, she demonstrated a strong work ethic, a never say 'NO' attitude, and a great deal of dedication which has led to success in all the tasks she worked on. I was very much impressed by her best practices which only develop in any individual as they get more experience, but M G Preethi acquired it at the very initial stage which is very commendable. She was dynamic in making inquiries and finding solutions for problems. She showed impactful dedication in completing tasks on time and she has been a key factor in delivering a product to customers on time. M G Preethi has exhibited a rare combination of speed and accuracy that has enabled her to produce a very high volume of work while maintaining very high standards for quality. All her work and the dedication she had shown didn't go in vain, she received the highest possible rating in all the cycles, and she had been the recipient of the "Brilliant of the Quarter" Award at Brillio Technologies.

M G Preethi was an efficient team player who always worked in tandem with her teammates and displayed a high understanding of the given jobs. Besides working in her task area, she always comes forward in grooming other junior team members to the level so that they can work independently. Her efforts and initiative resulted in the timely completion of projects, with quality outputs, much appreciated by the clients. Eventually, M G Preethi is one of the few people I would prefer to have on my team in a crunch situation.

M G Preethi always strives to learn new things and eager to upskill herself. Her enthusiasm is reflected in her work and her team. I always found her brimming with ideas for increased workplace productivity. Hence, keeping in view her knowledge of the subject, high work ethic, problem-solving potential, and her endeavour to learn new domains, I strongly believe M G Preethi has great potential to grow in the computer science field and act as an asset to the institution. I strongly recommend her for the master's program at your university with full financial aid. Please feel free to contact me for any further clarifications.
