## Technical Skills

---

- Java, Python
- Spring boot, Spring MVC, MicroServices, JUnit
- HTML, CSS, JavaScript
- MySQL, PostgreSQL

- Jenkins, Git, Postman, Jira, SonarQube, Confluence

## Academic Projects

---

### Baby monitoring System using IOT

Software: Python, Arduino Compiler, BLYNK android application

Hardware: Sound sensor, Soil Moisture Sensor, Speaker, Transformer 12v/1Amp, Capacitor, Relay two, Bread board, Node MCU

Description: IOT based baby monitoring system has introduced which works efficiently in real time. The mic in the system detects the babies cry and performs the action accordingly as provided, like playing songs and sending alert to the registered user email so that they can keep track about their baby. It also detects the wetness using Soil Moisture Sensor and sends the alert to register users through Blynk application.

### Haircut and spa booking system

Technology: Java, html, jsp, CSS, Spring, PHP.

Description: The project is once the user registers in Salon App, user will be listed with the list of services and their cost. Customer can choose their desired service and book a slot for the service based on the availability. The Application will also provide list of items used for a specific service and what is the process being followed.

## Training

---

- Completed the training on Cloud Services with AWS conducted by APSSDC.
- Participated in Skill Development Program on Advanced Data Science Tools conducted by Department of Information Technology, Sree Vidyanikethan Engineering College.
- Certified on SAFe for Teams Course.
- Completed Introduction to Cybersecurity through edX.
- Successfully Completed C test organized at Sree Vidyanikethan Engineering College with Course material provided by the Talk To A Teacher project at IIT Bombay.

## Extra-Curriculars

---

2018/10 – 2019

### Event Coordination and Conduction, SVEC Tirupati

Worked as an organizer and coordinator in Mohana Mantra, technical fest of SVEC Tirupati.
